1.

DesignBridge is a creative and multidisciplined firm founded in 1985 to provide complete services in architecture, interior design, and visual communications for both residential and commercial projects. What makes the firm unique is its ability to approach a project in a comprehensive manner that looks from the outside in, as well as, from the inside out. In addition to significant expertise as architects, DesignBridge professionals have extensive experience and knowledge as furniture designers and specifiers providing architectural spaces that respond to end users' functional and layout needs. Consequently, DesignBridge creates spaces which are more usable, compact and marketable from the onset. In other words, because the units are well designed, they are easier to sell.

In the past few years, DesignBridge has designed a significant number of residential units of all sizes and levels of complexity. This work has included both rehab as well as new construction. In addition to rehab and commercial projects, the firm is currently involved in the design of 22 new buildings of different sizes from single family houses to 100+ unit complexes. These projects are located all over the City and surrounding suburbs, from Northbrook on the north to as far south as Mt. Greenwood, which makes DesignBridge very familiar with Chicagoland and its idiosyncrasies.

2.

DesignBridge, Ltd., is an award winning, creative and multidisciplined architecture firm. The company's professional staff blends both architecture and interior design expertise to create residences that respond to end users' functional and layout needs, making them more usable, easy to furnish and, more importantly, easy to live in. Founded in 1985, DesignBridge is currently involved in the design of over 1,000 homes throughout the City and suburbs, from Northbrook on the north to as far south as Mt. Greenwood.
